

M249 200-Round Soft Pack

Mission

Provide a durable, reusable M249 Pack similar to the combat proven 100-round hard pack.

Description and Specifications

The **M249 200-Round Soft Pack** Program is a follow-on effort to the soft packs provided under the Rapid Fielding Initiative (RFI). Based on requests from the field, RFI fielded a 200-round soft pack for the M249 designed to improve weapon retention and reduce the noise signature associated with the standard plastic ammunition container. The program will evaluate all potential candidates and select the best 200-round soft pack that meets program requirements.
